

About

UNIXPackages is dedicated to providing quality application packages for UNIX. Our full time staff has been working on UNIX systems since 1982 and understands the need for reliable, safe UNIX builds that save time for administrators and end users. As a for profit company, we are focused on providing great value for money and dependable solutions that meet or exceed our customers' expectations.

UNIXPackages represents a thoughtful expansion of the sunfreeware.com effort and will continue to offer the high quality products first presented there.
