### Sys Admin

Our "Sys Admin" Subscription is targeted at the admin who is looking after a number of his/her own systems, and provides a range of downloads per year, HTTP file access, alerts for all packages.

### Corporate

The "Corporate" Subscription enables corporations to register multiple users who have access to 120 -> unlimited downloads (for their own use), options to bulk access files*, alerts, and expedited package requests.

### Value Added Reseller

Our Value Added Reseller "VAR" Subscriptions provide options for those supporting multiple End Users and their Solaris systems. The reseller may download our packages store them locally if required and distribute them throughout their End User. End User support questions are pre-qualified by the reseller before being forwarded to our support team.

## Premium Packages

UNIX Packages will create "Premium Packages" on an ongoing basis. This ad-hoc service provides single zip files that contains a core package i.e. apache along with **ALL** its dependencies saving time and ensuring you have all the files you need. These Premium Packages can be bundled together and purchased at a discount.

The current list of Premium Packages include:

- Apache **Solaris 10 & 11 now available**
